ABSTRACT

We as budding researchers, try to present science in the form of comics. We present the theory of light by Christiaan Huygens and Sir Isaac Newton in a short comic strip.

Keywords:

Theory of light
 Huygens
 Newton
 Comic

INTRODUCTION

THEORY OF LIGHT NEWTON

" From the light source, a very small part (particles) called a corpuscular is emitted"

" I have heard that there are those who disagree with the findings you have examined"

"They are Foucoult dan Fizeau"

" Really, Huygens, who is the person?"

" Really Huygens, I don't believe that those who don't approve of my findings."

" Finally in 1830 Foucoult and Fizeau found that the speed of light was smaller in water than in air. Foucoult and Fizeau based their experiments on Huygen's Undulation theory which states that light is a wave. This proof resulted in Newton's theory being abandoned."
